# SHUNNE GABRIEL M. SANDOVAL

Graphic Designer • UI/UX Designer • Marketing Designer
sandoval.shunne24@gmail.com • (+63) 09164693981 • Caloocan City, NCR, Philippines • https://shunne24th.github.io/portfolio/

## PROFESSIONAL EXPERIENCE

**Multimedia & Marketing Design Intern** | Servicio Service Provider *2025*

- Produced **6–15 marketing deliverables** — including publication materials, flyers, and digital ads — in direct support of a product launch campaign.
- Designed app icons and UI assets aligned with product branding guidelines, ensuring **visual consistency across platforms**.
- Edited and delivered promotional video content for social media campaigns and client-facing presentations.
- Collaborated directly with the marketing team to interpret brand direction and translate it into **production-ready visual assets**.

**Freelance Graphic Designer** | Firearms Training & Safety Industry *2025 – Present*

- Producing **social media graphics for Facebook and Instagram** — including post visuals, promotional materials, and engagement-driven content — consistently aligned with the client's brand identity and audience tone.
- Managing the **end-to-end design pipeline** from brief intake to final delivery, independently interpreting client direction and translating it into polished, platform-ready assets without creative oversight.
- Balancing **pure graphic execution with content ideation** depending on post requirements, demonstrating flexibility to operate at both the creative and strategic level of social media marketing.

## PROJECT PORTFOLIO

**Cats and Rats Party Scramble** | UI/UX Designer & Level Designer *Academic Project*

*Asymmetrical multiplayer mobile block-puzzle game developed in Unity • Showcased at UCC Games Exhibit*

- Led the **sole UI/UX design effort** for a casual mobile game targeting ages 7+, built around a cat-themed aesthetic and designed to evaluate the commercial viability of casual games in the current market.
- Developed a **storyboard-style user flow in Figma** mapping all screen transitions (menu → level select → gameplay and back), reducing design review cycles and giving the team a single clear reference throughout development.
- Applied a **simplified, child-accessible design language** to ensure the interface was easy to follow for younger audiences without sacrificing the game's strategic layer.

**Paagaw Challenge** | Lead 3D Level Designer, UI Designer & C# Scripter *Academic Project*

*Unity-based 3D game • Showcased at UCC Games Exhibit*

- Served as **lead 3D level designer**, constructing all level architecture in Autodesk Maya using industry-standard shortcuts, mouse controls, and naming conventions — reducing modeling iteration time by approximately **35%** through disciplined asset organization and categorization.
- Maintained a **structured asset pipeline** throughout: models were consistently named, categorized by function, and organized from concept to Unity integration — minimizing rework and keeping the team's workflow clean across the full production cycle.
- Designed all **menus and UI**, keeping layouts simple and readable while integrating assets directly into the Unity engine pipeline.

## EDUCATION & ACADEMIC CONTRIBUTIONS

**Bachelor of Science in Entertainment and Multimedia Computing** | University of Caloocan City *April 2026*

*Relevant Coursework: 3D Modeling & Animation, UI/UX Design, Game Design, Digital Media Production, Visual Communication*

**Technical Demonstrator — Game Design Webinar** | University of Caloocan City *March 2026*

- Facilitated a **department-wide webinar (50+ attendees)** on 3D Environment Creation in Unity using Autodesk Maya, covering the full game design workflow for junior-year students across multiple institutions.
- Presented hands-on demonstrations of the **end-to-end pipeline**: concept design, 3D modeling, UV mapping, texturing, Unity integration, and in-engine implementation.
- Broke down complex spatial modeling concepts and game engine workflows into **clear, actionable steps** accessible to non-specialist learners.

## CORE COMPETENCIES & TECHNICAL SKILLS

**Design Tools:** Figma, Adobe Photoshop, Adobe Illustrator, Canva, Clip Studio Paint, Krita
**3D & Motion:** Autodesk Maya (3D Modeling, UV Mapping, Texturing, Shortcuts & Workflow Optimization), CapCut (Video Editing)
**Development:** C# Scripting (Unity), UI Logic, Scene Transitions, Audio Implementation, Level Management
**Specializations:** Brand Identity, Marketing Collateral, Social Media Graphics (FB & IG), UI/UX Design, Print Design, Digital Illustration, Game UI
**Soft Skills:** Cross-functional Collaboration, Visual Communication, Knowledge Transfer, Attention to Detail, Client Management
